

Shohor

Every municipal service — online, paid for, and on the record.

Shohor is the Tiger One module for city corporations and pourashavas. Holding tax, trade licences, birth and death registration, market allotments, rents and complaints run as one governed system — citizens apply from a phone in Bangla, pay online, and the corporation gets a single auditable revenue record instead of paper ledgers spread across departments.

HOW A SERVICE RUNS, END TO END

- 1 Citizen applies online**
Bangla or English, on a phone. No trip to the office, no middleman.
- 2 System assesses the fee**
Rules per service, per ward, with arrears and penalties calculated automatically.
- 3 Citizen pays digitally**
ShurjoPay or SSLCommerz. Receipt issued instantly, money reconciled to the corporation account.
- 4 Officer approves in workflow**
Routed to the right department and role, with a full approval trail.
- 5 Certificate issues, record stands**
Printable official output, verifiable, permanently on file.

One citizen record · Digital revenue · Full audit trail · Deployed per client
